

THE RECONNECTION Practitioners' BIOS

Doug De Vito, BSChE, MBA, is the Head of Planning for The Reconnection and has the privilege and honor of helping to bring this work to the planet along with Eric Pearl. With a very traditional educational background in Chemical Engineering and an MBA in Marketing, he thought he would be the last person to be a part of teaching and bringing this forward. However, that was before this work "found him."

Doug joined The Reconnection in 2002, after working for 13 years in marketing and business development for Fortune 100 companies such as Procter & Gamble, AT&T and Walt Disney. During most of his career, Doug helped to create, "brand" and develop new businesses. He has also helped many new organizations "take root" and grow with a clear focus on their mission. All this changed, when one Friday, Doug's CEO walked into his office and shut down his division. The next day, Doug met Eric and was immediately "struck" by a passion and curiosity to explore this work.

Since joining the teaching team in 2002, Doug has been critical in helping to expand and shape The Reconnection's mission. Along the way, he discovered a deep passion for this healing work and has continuously marveled at the power and grace with which it unfolds in our lives. He established the first practitioner support programs and also created, taught and leads both The Reconnection Teacher Development and the Practitioner Mentoring Programs. More recently, Doug began leading The Reconnection's efforts to research this amazing new work with the collaboration of Dr. William A. Tiller, Dr. Gary Schwartz, the University of Arizona and others.

Doug has also been one of the primary instructors, teaching hundreds of seminars with Eric, over the past five years. In fact, Doug is the first person selected and trained by Dr. Pearl, to teach The Reconnection Level I/II and III seminars.

It is with great honor and a sense of gratitude that Doug continues to share the light and information of The Reconnection with the planet. He invites you to find your passion in this work and to step forward, sharing it in your own communities.

Prior to beginning his professional career, Doug graduated from the 3/2 Honors Program at Washington University in St. Louis, where he received both a Chemical Engineering degree and an MBA in 5 years.
